

SCHOOL OF BUSINESS AND INFORMATION TECHNOLOGY

Mission Statement

We develop the competencies of career-focused students to empower them as ethical, insightful, and solution-oriented decision-makers, leaders, and lifelong learners in increasingly complex and diverse global environments. Faculty is supported as practitioners and scholars, committed to innovation in teaching and intellectual contribution.

General Policies

Progression Requirements

1. You must successfully complete at least 75 percent of the graduate credit hours required for a degree with a grade of "A" or "B."
2. You can enroll in no more than one course per session for your first three sessions. After completing the third session, you may enroll in two courses per session if your cumulative GPA is 3.5 or higher. Exceptions to this policy require the approval of the Dean of the School of Business and Information Technology or a designee.
3. Prior learning credits and Purdue Global courses completed more than 5 years prior to the start of your information technology program are not eligible to satisfy information technology course requirements. You may be required to retake courses in order to ensure your knowledge is consistent with the current skills taught in these courses. You may request exceptions, based on relevant coursework and professional experience, from the Dean or a designee.

Programs

In addition to the programs below, see Additional Offerings (<https://catalog.purdueglobal.edu/additional-offerings/>) for information about other enrollment opportunities. For a list of additional offerings by subject, see the Area of Study index (<https://catalog.purdueglobal.edu/bulletin/#areaofstudyindextext>) of the Micro-credential Bulletin (<https://catalog.purdueglobal.edu/bulletin/>).

Master of Business Administration

The objective of the Master of Business Administration program is to help you pursue leadership positions in competitive business environments. The curriculum is designed to address this through a portfolio of practical, resume-building projects that satisfy your intellectual curiosity and help build the knowledge, skills, and abilities to make sound business and management decisions.

View Program Details (<https://catalog.purdueglobal.edu/graduate/business-information-technology/mba/>)

Master of Science in Accounting

The objective of the Master of Science in Accounting program is to prepare you with the knowledge, technical skills, and work habits to be an innovative and adaptable critical thinker and problem solver. The program is designed to prepare you to use available services and technologies to support operations and management, and the curriculum encourages you

to be a lifelong learner while addressing the evolving professional skills of master's degree students.

Master of Science in Cybersecurity Management

The Master of Science in Cybersecurity Management will prepare graduates for leadership roles directing and protecting critical information infrastructures. You will learn to develop, implement, evaluate, and update the cybersecurity policies and practices that allow an organization to effectively respond to the dynamic cybersecurity landscape.

View Program Details (<https://catalog.purdueglobal.edu/graduate/business-information-technology/cybersecurity-management-ms/>)

Master of Science in Data Analytics

The Master of Science in Data Analytics program was designed to provide analytics and other domain professionals with advanced-level knowledge in data analytics skills. In this program, you will apply current statistical theories, tools, and processes to curate, manipulate, and present various forms of data. You will master the ability to effectively process data that supports data-informed decisions. You will gain skills across the analytics life cycle, which include data discovery, data aggregation, planning of the data models, data model execution, communication of the results, and operationalization. Whether you intend to apply analytics skills to your current role, undertake a new specialized analytics position, or improve your decision-making by becoming a more analytics-informed leader, this program will help prepare you for those goals.

View Program Details (<https://catalog.purdueglobal.edu/graduate/business-information-technology/data-analytics-ms/>)

Master of Science in Finance

The Master of Science in Finance program focuses on helping you gain advanced technical knowledge and skills in a range of financial areas. Courses help increase your understanding of the factors that influence high-level decision making and provide you with opportunities to develop and implement your critical thinking skills to solve complex financial problems.

View Program Details (<https://catalog.purdueglobal.edu/graduate/business-information-technology/finance-ms/>)

Master of Science in Information Technology

If you have a bachelor's degree in information technology, computer science, information systems, management of information systems, or a similar field of study, the Master of Science in Information Technology could help you take the next step in your career. Alternatively, if you are changing careers, this program provides the background you need to shift your profession to an information technology role.

View Program Details (<https://catalog.purdueglobal.edu/graduate/business-information-technology/information-technology-ms/>)

Master of Science in Management and Leadership

The Master of Science in Management and Leadership program focuses on helping you build specialized leadership skills in a particular discipline and is designed to prepare you to pursue managerial and executive positions in a wide range of industries. From the start of the program, courses help you develop leadership knowledge and abilities that you can apply immediately to your work life and to help advance your career.
