MN501: Advanced Nursing Roles
This course explores skills and strategies essential to successful advanced nursing role implementation. Analysis of existing and emerging roles provides a foundation for selection of an individual advanced role specialization and an individual career development plan. Emphasis will be on the articulation of issues specific to the advanced nurse role in practice, administration, education, and informatics.
Quarter Credit Hours: 5 | Prerequisite: None

MN501M1: History, Concepts, and Role Development
Determine the impact of the APRN Consensus Model on APRN practice.
Quarter Credit Hours: 1 | Prerequisite: None

MN501M2: Practice, Collaboration, and Coaching
Examine advanced practice nursing roles with regards to their interaction with other health care providers in collaborative practice models.
Quarter Credit Hours: 1 | Prerequisite: None

MN501M3: Leadership
Investigate novel roles for advanced practice nursing related to emerging health care trends and needs.
Quarter Credit Hours: 1 | Prerequisite: None

MN501M4: Marketing and Negotiation
Develop a marketing plan for the advanced practice nurse that incorporates the competencies of advanced practice nursing.
Quarter Credit Hours: 1 | Prerequisite: None

MN501M5: Using Technology to Improve Performance
Evaluate a professional plan for career goals and lifelong learning.
Quarter Credit Hours: 1 | Prerequisite: None

MN502: Theoretical Foundations of Advanced Practice Nursing
This course explores the evolution of nursing, social science, education, and behavioral science theories and their contribution to the care of individuals, families, and the community. The utility of conceptual models are examined for application to executive, education, and practice leadership.
Quarter Credit Hours: 5 | Prerequisite: None

MN502M1: Sculptures and Schemes
Apply a conceptual framework focused on advanced nursing roles.
Quarter Credit Hours: 1 | Prerequisite: None

MN502M2: Perspectives
Apply a model of practice to the advanced nurse roles.
Quarter Credit Hours: 1 | Prerequisite: None

MN502M3: Grand View from the Middle-Range
Examine nursing theories related to advanced nursing roles.
Quarter Credit Hours: 1 | Prerequisite: None

MN502M4: Be Informed
Reconstruct a nursing theory based on advanced nursing roles.
Quarter Credit Hours: 1 | Prerequisite: None

MN502M5: Explore the Ideal
Evaluate nursing theory and how theory influences your nursing practice.
Quarter Credit Hours: 1 | Prerequisite: None

MN504: Scientific and Analytic Approaches to Advanced Evidence-Based Practice
This course presents an evidence-based approach to promote high-value, safe, and effective health care. The focus is on the assessment of levels of evidence to evaluate emerging health issues, develop competencies in analysis, translate evidence into practice, and explore evidence-based practice innovations. Qualitative and quantitative methods of inquiry and associated statistical analyses are identified. Strategies to create an environment for the integration of evidence-based practice to support executive, education, and practice leadership are identified.
Quarter Credit Hours: 5 | Prerequisite: None

MN504M1: Finding Evidence-Based Data in Nursing Practice
Discover evidence-based data used in clinical practice.
Quarter Credit Hours: 1 | Prerequisite: None

MN504M2: Rating Key Elements of Evidence-Rating Process
Examine the key elements of evidence-based practice.
Quarter Credit Hours: 1 | Prerequisite: None

MN504M3: Understanding Statistical Overview of Research
Differentiate statistical output for data analysis.
Quarter Credit Hours: 1 | Prerequisite: None

MN504M4: Evaluating Level of Evidence in Existing Practice and Research
Evaluate evidence-based nursing findings from nursing research.
Quarter Credit Hours: 1 | Prerequisite: None

MN504M5: Interdisciplinary System Approach in Evidence-Based Practice
Evaluate interdisciplinary approaches to organizational and system change through evidence-based practice.
Quarter Credit Hours: 1 | Prerequisite: None

MN505: Epidemiology and Health Promotion
This course incorporates theoretical and empirical concepts related to health beliefs, health promotion, and risk reduction of diverse populations. Principles from the Healthy People initiative, epidemiology, biostatistics, and cultural competence guide comparisons of groups and inference development. Strategies and benefits of health promotion interventions are emphasized.
Quarter Credit Hours: 5 | Prerequisite: None

MN505M1: Clinical Epidemiology
Interpret epidemiologic data on morbidity and mortality related to acute and chronic disease states.
Quarter Credit Hours: 1 | Prerequisite: None

MN505M2: Health Promotion - Applying Interventions
Apply a theory or model of health-related concepts to a community intervention.
Quarter Credit Hours: 1 | Prerequisite: None

MN505M3: Epidemiology and Health Promotion Risk Synthesis
Analyze health promotion and illness prevention risk factors in a multicultural context.
Quarter Credit Hours: 1 | Prerequisite: None

MN505M4: Healthy Populations
Develop an evidence-based health promotion program to reduce health risks of a vulnerable population.
Quarter Credit Hours: 1 | Prerequisite: None

MN505M5: Interprofessional Health Promotion
Evaluate interprofessional health promotion resources.
Quarter Credit Hours: 1 | Prerequisite: None
MN506: Health Policy, Ethical, and Legal Perspectives of the Health Care System
This course provides an opportunity to analyze major ethical theories and those principles underlying direct and indirect care of individuals, families, and communities. Selected concepts, principles, and cases involving legal aspects of care within a framework of critical decision making for advanced nursing roles will be examined. The development and influence of health policy issues on the health care of individuals, families, and populations will be analyzed.
Quarter Credit Hours: 5 | Prerequisite: None

MN506M1: Ethics and Social Responsibility - Concepts and Theory
Apply theoretical frameworks and concepts to ethical dilemmas in the advanced practice role.
Quarter Credit Hours: 1 | Prerequisite: None

MN506M2: Ethical-Legal Issues in Health Care
Analyze ethical-legal principles and dilemmas related to health care.
Quarter Credit Hours: 1 | Prerequisite: None

MN506M3: Evaluation of Contemporary Health Policy
Analyze the effects of contemporary health policy on providers and consumers.
Quarter Credit Hours: 1 | Prerequisite: None

MN506M4: Advanced Practice Nursing - Legislative and Policy Strategies
Assess the strengths and weaknesses of the current health care act of the United States.
Quarter Credit Hours: 1 | Prerequisite: None

MN506M5: Advanced Practice Nursing - Policy and Advocacy
Critique the role of nursing advocacy in the implementation of health policy.
Quarter Credit Hours: 1 | Prerequisite: None

MN507: Promoting Optimal Models and Systems for Health Care Delivery
The course will focus on the dynamic, complex, and integrated health care system and organizational imperatives to deliver high-value, safe and effective health care based on industry standards, key outcome indicators, and cost-quality imperatives. The organization and delivery of health care is explored, including business aspects of health care systems and pertinent financial issues in the relationship between policy and health care system reform. Strategies to develop leadership roles in professional nursing organizations, legislative bodies, and community/consumer organizations will be identified. Various health care delivery systems and reimbursement models will be presented.
Quarter Credit Hours: 5 | Prerequisite: None

MN507M1: Health Policy Structure and Agenda Setting
Examine U.S. health care policy structures and the role of the nursing leader as a change agent at the public policy table.
Quarter Credit Hours: 1 | Prerequisite: None

MN507M2: Financial Models and Reimbursement
Analyze financial models of reimbursement and their effects on patients and health care providers.
Quarter Credit Hours: 1 | Prerequisite: None

MN507M3: Health Care Policy Models
Recommend public policy options to meet the needs of various stakeholders.
Quarter Credit Hours: 1 | Prerequisite: None

MN507M4: Health Care Reform and Genetics and Genomics Research
Synthesize the effect health care reform has on stakeholders.
Quarter Credit Hours: 1 | Prerequisite: None

MN507M5: Interprofessional Practice and Global Health Care Environments
Evaluate the role of health policy and organizational structure on quality improvement within health care environments.
Quarter Credit Hours: 1 | Prerequisite: None

MN512: Leadership, Organizational Theory, and Behavior
This course exposes students to organizational theory and behavior and competencies essential for successful leadership and management roles in a global health care delivery system. There is emphasis on self-analysis and strategies for best practice to effectively implement key leadership and management concepts in dynamic health care environments.
Quarter Credit Hours: 5 | Prerequisite: Completion of all core courses in the Master of Science in Nursing or prior completion of a master's degree with an upper-level major in nursing

MN513: Health Care Finance, Strategic Planning, and Budgeting
This course examines macro- and microeconomics in profit and nonprofit health care organizations for nonfinancial managers. An analysis of decision making and strategic planning focuses the nursing leader toward plans that effectively promote success in dynamic health care environments. Conceptual and descriptive approaches are utilized to provide an overview of current practices and notable advances in strategic management. A budget is created within a case study model, allowing analysis of potential and actual budget variations.
Quarter Credit Hours: 5 | Prerequisite: Completion of all core courses in the Master of Science in Nursing or prior completion of a master's degree with an upper-level major in nursing

MN514: Human Resources Management
This course presents a managerial overview of various aspects of personnel management in a fiscally responsible environment. Activities are designed to familiarize students with recruiting, training, and retaining the best employees; ensuring high performance; and conforming practices to various regulations. Exercises designed to develop ability in personnel policy development and implementation are offered.
Quarter Credit Hours: 5 | Prerequisite: Completion of all core courses in the Master of Science in Nursing or prior completion of a master's degree with an upper-level major in nursing

MN515: Innovation in Health Care Information Technology - Administrative and Advanced Practice Priorities
This course focuses on the strategic application of information technology in health care organizations by administrative and advanced practice nursing leaders. Students will explain the role of executive-level practitioner management in planning and operationalizing technologies to enhance health care technology data efficiency; evaluate the challenges of virtualization management models and the requirements for innovative and effective alternatives in health care reform; and critique the legal and ethical oversight responsibilities of the executive nurse when engaging and managing a comprehensive, systematic electronic medical record project.
Quarter Credit Hours: 5 | Prerequisite: Completion of all core courses in the Master of Science in Nursing or prior completion of a master's degree with an upper-level major in nursing
MN520: Executive Leader Practicum
This practicum (90 hours) provides you with a mentored learning experience in the content area and site selected by you and approved by the Practicum Coordinator.
Quarter Credit Hours: 5 | Prerequisite: Completion of all core courses in the Master of Science in Nursing or prior completion of a master's degree with an upper-level major in nursing, and completion of all specialization courses

MN523: Teaching and Learning Theories and Strategies
This course explores the advanced nursing practice teaching roles of educating patients and families, health care professionals, and nursing students. Teaching and learning theories are examined as well as teaching strategies and factors that impact learners.
Quarter Credit Hours: 5 | Prerequisite: Completion of all core courses in the Master of Science in Nursing or prior completion of a master's degree with an upper-level major in nursing

MN524: Curriculum Design, Assessment, and Evaluation
This course provides content and learning experiences that enable you to comprehend and apply the curriculum development process and assessment and evaluation strategies. You will design, deliver, and evaluate an education program for an audience (patients, staff, or nursing students) and specialty topic of your choice.
Quarter Credit Hours: 5 | Prerequisite: MN523

MN530: Critical Concepts and Competencies for the Informatics Nurse Specialist
This course introduces students to the field of health care informatics and information and communication technology. The theories, models, frameworks, and competencies that shape informatics are explored. The course provides content on informatics terminology and the system life cycle. Specific focus is placed on Internet technologies, hardware and software applications, and networked environments.
Quarter Credit Hours: 5 | Prerequisite: Completion of all core courses in the Master of Science in Nursing or prior completion of a master's degree with an upper-level major in nursing

MN531: Innovations in Educational and Research Technologies
This course will explore the technology that prepares the nurse informatics specialist to develop innovative teaching strategies based on sound pedagogical principles. You are introduced to conferencing tools, mind mapping, virtual worlds, interactive games, and simulations. The use of voice, videos, animation, and graphics are covered. You will explore databases and guidelines used to support evidence-based research and other research tools.
Quarter Credit Hours: 5 | Prerequisite: MN530 and completion of all core courses in the Master of Science in Nursing or prior completion of a master's degree with an upper-level major in nursing

MN532: Integration of Informatics Into the Health Care Environment
This course further develops the nurse informatics specialist's knowledge and skills necessary to integrate technology, communication devices, and information systems into the health care setting. The student will explore the nurse's role related to the application of information system solutions.
Quarter Credit Hours: 5 | Prerequisite: MN530, MN531, and completion of all core courses in the Master of Science in Nursing or prior completion of a master's degree with an upper-level major in nursing

MN533: Health Systems Project Management
This course explores the role of a nurse leader in strategic information technology system planning and administration with an analysis of the role of project management. Legal and ethical policies and procedures that ensure privacy and confidentiality will be evaluated. Regulatory and accreditation issues will be analyzed. The course will prepare the student to be a leader in planning, implementation, and evaluation of information systems in health care. The emphasis will be on analysis of project management.
Quarter Credit Hours: 5 | Prerequisite: MN530, MN531, MN532, and completion of all core courses in the Master of Science in Nursing or prior completion of a master's degree with an upper-level major in nursing

MN534: Nurse Informatics Specialist Practicum
This practicum (200 hours) allows you the opportunity to apply concepts of nursing informatics in a health care setting selected by you and approved by course faculty. You will work closely with a mentor and contract to work on agency-designated projects.
Quarter Credit Hours: 5 | Prerequisite: MN530, MN531, MN532, MN533, and completion of all core courses in the Master of Science in Nursing or prior completion of a master's degree with an upper-level major in nursing

MN551: Advanced Physiology and Pathophysiology Across the Life Span
This course integrates knowledge of advanced physiology and pathophysiology across the life span and the clinical implications for the advanced practice nurse. Function and dysfunction of organ systems are analyzed from the cellular level through the integrated organ level. You will examine the pathophysiological factors that influence the incidence and manifestations of acute, episodic, and chronic diseases in populations across the life span. Disease processes and symptom management approaches are investigated utilizing an evidence-based approach. Influences of gender, genetic, ethnic, cultural, and temporal variables of human disease are analyzed.
Quarter Credit Hours: 5 | Prerequisite: Completion of all MSN core courses

MN552: Advanced Health Assessment and Diagnostic Reasoning
This course addresses the theoretical principles and practical application of advanced physical assessment and history-taking throughout the lifespan. Relationships between assessment findings and underlying physiology and pathophysiology to the healthy and unhealthy client are investigated. Emphasis is on developing critical diagnostic thinking through interpretation of subjective and objective data, identification of normal and abnormal conditions, and the systematic reporting of summative findings. Clinical judgment and clinical reasoning skills are used in establishing differential diagnoses. Students will learn to address variables such as age, culture, ethnicity, and developmental stages into their differential diagnosis and evaluation and management plans.
Quarter Credit Hours: 5 | Prerequisite: MN551 and MN553

MN553: Advanced Pharmacology and Pharmacotherapeutics
This course integrates advanced knowledge of pharmacology, pharmacokinetics, pharmacodynamics, and genomics across the lifespan and prepares the advanced practice nurse to prescribe pharmacotherapeutics safely and effectively. You will examine ethical, legal, regulatory, and cost-effective prescribing practices of the advanced practice nurse. Communication plans for the interdisciplinary team, clients, and/or families for both prescriptive and nonprescriptive drug therapies will be explored.
Quarter Credit Hours: 5 | Prerequisite: MN551; course may also be taken as a corequisite
MN559: Essentials of Advanced Pathophysiology and Pharmacology
This course integrates essential knowledge for advanced nursing practice of physiology and pathophysiology, pharmacology, pharmacokinetics, pharmacodynamics, and genomics across the lifespan. Function and dysfunction of organ systems are analyzed from the cellular level through the integrated organ level. You will examine the pathophysiological factors that influence the incidence and manifestations of acute, episodic, and chronic diseases in populations across the lifespan. Disease processes and symptom management approaches are investigated utilizing an evidence-based approach. Influences of gender, genetic, ethnic, cultural, and temporal variables of human disease are analyzed. Communication and teaching plans for patients and/or families will be explored for pathological states and both prescriptive and nonprescriptive drug therapies.
Quarter Credit Hours: 5 | Prerequisite: None

MN566: NP I - Introduction to Primary Care for the Nurse Practitioner
This course examines the range of acute and chronic conditions experienced by clients in the primary care setting which are within the scope of practice of the primary care nurse practitioner. You will develop a consistent approach to screening, assessment, utilization of diagnostic procedures, diagnosis, symptom management, disease treatment, and health promotion activities. Content builds upon previous diagnostic knowledge and clinical reasoning skills in the development of differential diagnosis and appropriate diagnostic workups. Age-appropriate, culturally sensitive, evidence-based plans of care are created. Communication skills and cooperative relationships with patients, families, and an interdisciplinary health care team approach is emphasized. The course explores health promotion and health maintenance approaches and strategies that incorporate individual health beliefs and practices.
Quarter Credit Hours: 5 | Prerequisite: Prerequisites/Corequisites: MN505 and MN552

MN568: FNP I - Primary Care Across the Life Span
This course examines the range of illnesses and conditions experienced by clients across the life span and gender in primary care settings. Illustration of a consistent approach to the evaluation and management of these illnesses and conditions is emphasized. You will expand your diagnostic and clinical reasoning and differential diagnoses abilities through continued application of new and previously acquired knowledge and skills in caring for clients who present acute, episodic, and chronic illness and conditions. You will formulate evidence-based management plans that address client health beliefs, developmental and family lifecycle stages, health promotion, screening, and health maintenance behaviors. Collaborative relationships with the client, family, and intradisciplinary health care team are emphasized. Oral and written skills using advanced technology are emphasized.
Quarter Credit Hours: 5 | Prerequisite: MN566

MN569: FNP I Clinical - Life Span Health Focus
This introductory course will provide students with the foundation of critical thought process in differential diagnosis. Common acute and chronic illness across the lifespan will be discussed. Common risk assessment, screening, and lifestyle modification will be presented. Introduction to paper and computerized documentation in the primary care setting will begin. Students will begin to develop collaborative skills involving the client, family, and the intradisciplinary health care team.
Quarter Credit Hours: 5 | Prerequisite: MN568; course may also be taken as a corequisite

MN572: AGNP I - Primary Care of the Adolescent and Adult
This course will focus on the primary care of clients from age 12 to late adulthood. The focus will be on gaining competence in understanding acute and chronic illnesses and their management. Health promotion, screening, and risk management is presented as integral to the primary care focus. Interdisciplinary team building for the care of the client is introduced.
Quarter Credit Hours: 5 | Prerequisite: MN566

MN573: AGNP I Clinical - Adolescent and Adult Focus
This clinical course introduces beginning skills in assessing, diagnosing, and treating common acute and chronic health conditions in the client aged 12 years through adulthood. The focus will be on pharmacologic and nonpharmacologic interventions as well as health promotion, screening, and lifestyle modification techniques.
Quarter Credit Hours: 5 | Prerequisite: MN572; course may also be taken as a corequisite

MN576: NP II - Primary Care of Women's Health
This course will focus on primary health care specific to female clients. Focus will be on reproductive health maintenance, pregnancy prevention and management, care of the menopausal woman, and the assessment, diagnosis, and management of conditions specific to the female. Contemporary trends and issues that impact women's health status will be discussed.
Quarter Credit Hours: 5 | Prerequisite: MN568 and MN569, or MN572 and MN573

MN577: NP II Clinical - Women's Health Focus
This clinical course will focus on the unique needs of women across the lifespan. The unique care of women will be approached with attention to the psychosocial, ethnic, and cultural influences that affect physical and mental health. A collaborative approach to care will be employed.
Quarter Credit Hours: 5 | Prerequisite: MN576; course may also be taken as a corequisite

MN580: FNP II - Primary Care of Children and Adolescents Health
The course will focus on the primary care of individuals from birth to age 21 years. Assessment, diagnosis, and management of common acute and chronic health care issues will be explored. Health maintenance, screening, and anticipatory guidance with a focus on involving and educating parents, as appropriate, will be included. Assessment skills learning will include physical, psychosocial, mental health, and genetic/familial issues.
Quarter Credit Hours: 5 | Prerequisite: MN568 and MN569

MN581: FNP II Clinical - Children and Adolescent Health Focus
This clinical course will allow the student nurse practitioner opportunity to assess, diagnose, and manage acute and chronic health care issues in the pediatric and adolescent population in a primary care setting. Health maintenance, screening, and anticipatory guidance activities will take place in collaboration with the preceptor. Collaboration, communication, and referral with other health care and social service organizations will be conducted as part of a team approach to management.
Quarter Credit Hours: 5 | Prerequisite: MN580; course may also be taken as a corequisite
MNP4: AGNP II - Primary Care of the Frail Elderly
This course addresses the physical and psychosocial health and function of the frail elderly adult. Biologic, psychosocial, and social theories of aging will be explored. Strategies to promote health, minimize disability, and maximize quality of life within the context of independent living, assisted living environments, and skilled care facilities will be introduced. Alternatives to institutionalized care will be explored. Assessment and management of acute and chronic health conditions specific to the frail elderly will be discussed. Palliative care for terminal conditions will be addressed. Financial issues specific to the frail elderly will be analyzed.
Quarter Credit Hours: 5 | Prerequisite: MN572 and MN573

MNP5: AGNP II Clinical - Frail Elderly Focus
This clinical course will provide opportunity for students to assess, diagnose, and manage treatment of acute and chronic disease in the frail elderly. Adaptive interventions to meet the complex needs of the frail elderly arising from normal changes in the developmental stages of aging, multiple system dysfunction, psychosocial, and financial issues will be utilized. Optimizing a collaborative relationship with the client, caregiver, and other members of the health care team will be discussed.
Quarter Credit Hours: 5 | Prerequisite: MNP4; course may also be taken as a corequisite

MNP0: Applying Principles of Advanced Nursing Practice - Clinical
This course explores the advanced nursing practice roles of change agent and leader to influence health care outcomes for individuals, populations, or systems. A synthesis of the MSN and nurse educator program outcomes will be applied to an evidence-based practice project aimed at improving health care outcomes. All projects include a teaching component for patients and/or their families or other health care professionals. Students complete 100 clinical hours for this course.
Quarter Credit Hours: 5 | Prerequisite: MNP4; course may also be taken as a corequisite

MNP0: Evidence-Based Practice Project
As a culmination of the theories in nursing, evidence-based decision making, health policy, finance, health care delivery systems, practice issues, ethics, health promotion, disease prevention, and biostatistics, you will develop a manuscript eligible for publication in a professional nursing journal. The content of this manuscript will reflect the clinical project paper and its outcomes from your prior nursing courses.
Quarter Credit Hours: 5 | Prerequisite: Completion of all core courses in the Master of Science in Nursing or prior completion of a master's degree in nursing and all concentration courses; may not concurrently register for MNP20 or MNP34

MNP0: Evaluating and Disseminating Principles of Advanced Nursing Practice - Clinical
In this course, students continue to explore the advanced nursing practice roles of change agent and leader through completion, evaluation, and dissemination of their evidenced-based practice project to influence health care outcomes for individuals, populations, or systems. Students complete 100 clinical practicum hours for this course.
Quarter Credit Hours: 5 | Prerequisite: MNP40

MNP5: Transition to Practice
This course completes the summative process for students to design and develop their individual role as an advanced practice nurse in primary care. Various careers available to the advanced practice registered nurse will be explored. Professional advocacy activities will be demonstrated. The student will differentiate between supervised, collaborative, and independent practice models. Malpractice and scope of practice issues specific to the primary care nurse practitioner role will be analyzed. Entrepreneurial opportunities for primary care nurse practitioners will be explored.
Quarter Credit Hours: 5 | Prerequisite: MNP77; MNP81 or MNP85; and MNP610 (may be taken as a corequisite)

MNP0: NP III Clinical - Primary Care Focus
This clinical course focuses on the clinical application of assessment, differential diagnosis, symptom management, and disease treatment in the primary care setting. You are expected to assess and manage common acute episodic and chronic health illnesses across gender and age span in consultation with your clinical preceptor. Initiation of health promotion and health maintenance activities with individuals and groups is stressed. This final clinical experience enables you to synthesize skills and knowledge gained across the curriculum.
Quarter Credit Hours: 5 | Prerequisite: MNP77; MNP81 or MNP85

MNP5: Specialized Pharmacology for the AGACNP Acute Care NP
This course builds upon knowledge attained in the advanced pharmacology course with special attention to the needs of the adult and geriatric population in an acute care setting. This course focuses on safe and effective prescribing of cost-effective pharmacotherapeutics in the acute care environment. You will examine ethical, legal, and regulatory prescribing practices of the advanced practice nurse. Communication plans for the interdisciplinary team, clients, and/or families for both prescriptive and nonprescriptive drug therapies will be explored.
Quarter Credit Hours: 2 | Prerequisite: MNP51, MNP52, MNP53, and completion of all core courses in the Master of Science in Nursing

MNP5: AGACNP Introduction to Acute Care Management
This course is an introduction to the role and responsibilities of the adult-gerontology acute care nurse practitioner (AGACNP). The course introduces the range of acute and chronic conditions experienced by patients in the acute care setting, which are within the scope of practice of the acute care nurse practitioner. Age-appropriate, culturally sensitive, evidence-based plans of care are created. Cooperative relationships with patients, families, and the interdisciplinary health care team are emphasized. You will explore common primary and acute care health conditions and health promotion/maintenance strategies that incorporate individual cultural and health beliefs and practices.
Quarter Credit Hours: 4 | Prerequisite: MNP51, MNP52, MNP53, completion of all core courses in the Master of Science in Nursing, and MNP650 (course may also be taken as a corequisite)

MNP6: AGACNP Acute Care Diagnosis and Management I
This course introduces the theoretical foundation of assessment, diagnosis, and treatment of adult and geriatric acute episodic and unstable chronic health conditions in the acute care environment. Clinical practice guidelines will be explored. You will further develop conceptual knowledge of assessment and management of health, illness, and disease prevention. Interdisciplinary collaboration for the care of the client is introduced.
Quarter Credit Hours: 5 | Prerequisite: MNP51, MNP52, MNP53, completion of all core courses in the Master of Science in Nursing, MNP650, and MNP651
MN653: AGACNP Acute Care Diagnosis and Management Clinical I
This clinical (160 hours) course focuses on interviewing and physical examination techniques to formulate differential diagnoses and management of adult and geriatric acute episodic and unstable chronic health conditions in the acute care environment. You will have the opportunity to implement the role of the nurse practitioner with adults in an acute care setting. You are expected to assess and manage common acute episodic and chronic unstable illnesses and conditions in consultation with your clinical preceptor. Initiation of health promotion and health maintenance activities with individuals and groups is stressed.
Quarter Credit Hours: 5 | Prerequisite: MN551, MN552, MN553, completion of all core courses in the Master of Science in Nursing, MN650, MN651, and MN652 (course may also be taken as a corequisite)

MN654: AGACNP Acute Care Diagnosis and Management II
This course builds on AGACNP Acute Care Diagnosis and Management I. The focus will be on the further development of knowledge related to the diagnosis, treatment, and evaluation of adult and geriatric patients with acute episodic and chronic health conditions in the acute care environment. Emphasis is placed on the formation and evaluation of evidence-based plans of care for acute episodic and chronic, unstable, multisystem disorders in adult and geriatric patients.
Quarter Credit Hours: 5 | Prerequisite: MN551, MN552, MN553, completion of all core courses in the Master of Science in Nursing, MN650, MN651, MN652, and MN653

MN655: AGACNP Acute Care Diagnosis and Management Clinical II
This clinical (160 hours) course provides you with continued opportunity to further refine the management of medically or surgically complex patients in the acute care setting under the supervision of a preceptor. You will develop a comprehensive list of differential diagnoses and order cost-effective diagnostic and laboratory tests for the patient’s symptoms and diseases. Applying diagnostic reasoning and clinical judgment, you will develop and evaluate individualized management plans that consider the numerous factors affecting client adherence to prescribed treatment plans such as health beliefs and cultural practices.
Quarter Credit Hours: 5 | Prerequisite: MN551, MN552, MN553, completion of all core courses in the Master of Science in Nursing, MN650, MN651, MN652, MN653, and MN654 (course may also be taken as a corequisite)

MN656: AGACNP Critical Care Management
This course focuses on the advanced synthesis and management of critical care acute episodic and chronic health conditions for adult and geriatric patients in the acute care environment. Emphasis is placed on advanced proficiency in the formation and evaluation of evidence-based plans of care for acute episodic and chronic multisystem disorders in adult and geriatric patients. This course provides a comprehensive review of the acute care curriculum.
Quarter Credit Hours: 5 | Prerequisite: MN551, MN552, MN553, completion of all core courses in the Master of Science in Nursing, MN650, MN651, MN652, MN653, MN654, and MN655

MN657: AGACNP Critical Care Management Clinical
This final clinical course requires 200 hours to be completed during the 10 weeks; 100 of those hours must be in an approved critical care setting, emergency department excluded. This course provides you the opportunity to immerse yourself in the role of the acute care nurse practitioner. An acute care preceptor and site are required for this course. You will be required to apply the principles of clinical judgment, assessment, and diagnostic reasoning to the evaluation and management of adult and geriatric acute episodic and chronic health conditions in the acute care environment. During this course, you will practice more independent decision-making skills while using the preceptor as a clinical resource and mentor. You are expected to develop a stronger identity as an advanced practice nurse as you implement all aspects of the role, including provider and educator, as well as demonstrate a commitment to ensuring quality care through consultation, collaboration, documentation, continuing education, certification, and self-reflection. This course includes a diagnostic readiness test for national certification.
Quarter Credit Hours: 5 | Prerequisite: MN551, MN552, MN553, completion of all core courses in the Master of Science in Nursing, MN650, MN651, MN652, MN653, MN654, MN655, and MN656 (course may also be taken as a corequisite)
