

# SCHOOL OF **MULTIDISCIPLINARY AND** PROFESSIONAL STUDIES

The icon appears in the title of traditional courses that are also available as a set of module courses.

#### **Mission Statement**

The School of Multidisciplinary and Professional Studies supports the academic, social, personal, and professional development of learners throughout their engagement with the University. It also provides a learning experience that is engaging, enjoyable, and applicable to students' personal and professional lives while preparing students to meet expectations in chosen fields of study. Purdue Global is committed to professional and career preparation for all graduates. As an institution and an educational community, we commit to graduating "thinkers who can work and workers who can think."

# **Programs**

In addition to the programs below, see Additional Offerings (https:// catalog.purdueglobal.edu/additional-offerings/) for information about other enrollment opportunities. For a list of additional offerings by subject, see the Area of Study index (https://catalog.purdueglobal.edu/bulletin/ #areaofstudyindextext) of the Micro-credential Bulletin (https:// catalog.purdueglobal.edu/bulletin/).

# **Bachelor of Science in Professional Studies**

The Bachelor of Science in Professional Studies (BSPr) is an excellent choice if you are a student with prior learning from an assortment of accredited sources such as transfer credit, portfolio credit, open course credit, credit by exam, or credit for military training or other experiential learning. The BSPr is an interdisciplinary program that meets the needs of working professionals while addressing both academic rigor and flexibility.

## **Bachelor of Science in Sustainability**

This interdisciplinary program in sustainability addresses challenges and opportunities around the world. The degree plan is designed to equip you with multiple critical thinking and communication skills to make you competitive in an evolving global job market. A diversified science background will help you identify environmental issues, develop sustainable practices, and implement mitigation strategies to solve realworld problems for a more resilient planet. Topics related to social and environmental justice, energy use, conservation, pollution reduction, and management will equip you with the tools needed to address pressing environmental challenges.
